ACKNOWLEDGING OUR REVIEWERS
(January 1, 2014 – November 20, 2015)

*Human Technology: An Interdisciplinary Journal on Humans in ICT Environments* is an interdisciplinary, online scholarly journal investigating the multiple facets of humans in interaction with technologies. Because we are an interdisciplinary journal, we have sought out experts from around the world in a variety of fields related to the field of human–technology. Over the last 2 years, more than 100 scholars, in universities, research organizations, and technology-based businesses, have kindly accepted the invitation to review the dozens of manuscripts submitted and invited for consideration in *Human Technology*. We are deeply grateful for the time, effort, and wise recommendations these individuals have provided to the editorial staff of *Human Technology* in assessing suitability for publication and helping improve the manuscripts under consideration.
