

## **ACKNOWLEDGING OUR REVIEWERS (December 1, 2017–November 28, 2019)**

*Human Technology* is an interdisciplinary, online scholarly journal investigating the multiple facets of humans in interaction with technologies. As an interdisciplinary journal, it has been imperative that we editors seek out experts from around the world in a variety of fields related to the field of human–technology and whose fields of expertise align with the topics of the papers submitted to our journal. Over the last 2 years, more than 100 scholars—from universities, research organizations, and technology-based businesses—have kindly and graciously completed a review of one of the dozens of manuscripts submitted for publication consideration in *Human Technology*. We are deeply grateful for the time, effort, and wise recommendations these individuals have provided to the editorial staff of *Human Technology* in assessing the submissions’ suitability for publication and in helping improve the manuscripts that remained under consideration.
