

ACKNOWLEDGING OUR REVIEWERS (September 2011 – December 2013)

Human Technology: An Interdisciplinary Journal on Humans in ICT Environments is an interdisciplinary, online scholarly journal investigating the multiple facets of humans in interaction with technologies. Because we are an interdisciplinary journal, we have sought out experts from around the world in a variety of fields related to the field of human-technology. Over the last 2 years or so, more than 60 scholars, in universities, research organizations, and technology-based businesses, have kindly accepted the invitation to review the dozens of manuscripts submitted and invited for consideration in *Human Technology*. We are deeply grateful for the time, effort, and wise recommendations these individuals have provided to the editorial staff of *Human Technology* in assessing suitability for publication and helping improve the manuscripts under consideration.
